

316L Stainless Steel Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. 316L alloy is a lower carbon version of the 316 alloy. The **Stainless Steel 316L Pipe/ Tube** is composed of molybdenum, nickel, and chromium in its composition. The molybdenum content in this grade makes it highly corrosion-resistant and easy to weld. Designed with a minimum tensile strength of 458Mpa, the Stainless Steel 316L Pipe is widely used in many marine industries. These pipes show 40% elongation and possesses minimum yield strength of 170Mpa. The density of the Stainless Steel 316L Tube is 8000 kg/m³. These tubes show high resistance in chloride ion-rich environments along with aqueous conditions. The austenitic nature allows these tubes to function well at cryogenic temperatures.

We are the leading supplier of Stainless Steel 316L Pipe/Tube in the country. Our goal is to deliver the best products at reasonable rates to our customers. The **Stainless Steel 316L Seamless Pipe** can range from ½ to 24 inches. Due to the presence of low carbon carbide precipitation is eliminated. These pipes can suffice well at temperatures of 800 degrees F. The SS 316L Welded Pipe is available in sizes ranging from 6 to 100 inches. These pipes are used in high-temperature and pressure systems depending on their grade and thickness.

316L Stainless Steel Pipes, 316L Stainless Steel Welded Rectangular Pipes Manufacturers, 316L Stainless Steel Seamless Pipe Suppliers, 316L Stainless Steel Marine Exhaust Pipe Exporters 316L Stainless Steel Polished Decorative Pipe Stockists.

316L Stainless Steel Square Pipe in India, 316L Stainless Steel Pipes Manufacturers in India, 316L Stainless Steel Rectangular Pipe Suppliers in India, 316L Stainless Steel Hydraulic Pipe Exporters in India, 316L Stainless Steel ERW Pipes Stockists in India.
