

347/347H Stainless Steel Sheets & Plates

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **347H Stainless Steel Sheets** can be welded by resistance and fusion methods. It's forging, upsetting, and other hot work processes can be performed at 1149 - 1232°C. **347 Stainless Steel Plates** are a little better corrosion resistance against 347/347H Stainless Steel Plates in a strongly oxidizing environment. It is stabilized with columbium and due to its good resistance to intergranular attack, it is preferable for aqueous and low-temperature environments. There are different sizes, dimensions, thicknesses, and shapes.

SA240 347H Foil is a little tougher than SA240 347/347H foil. Its hardenability can be minimized by constant positive feeds and slow speeds. SA240 Type 347 perforated sheet is made through the method of "die and punches" perforating. A sheet with needles is continuously pressed onto the passing sheet which punches holes into the sheet. From the punching, the remaining pieces are sheared off and the surface gets smoothed. AISI 347 has high-temperature oxidation resistance is similar to that of 347/347H plates.
