

409 Stainless Steel Sheets & Plates

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **409 Stainless Steel Sheet** is especially useful for applications that require oxidation or corrosion protection beyond the capability of carbon sheet and coated steel. It offers economical corrosion resistance and good formability. **409 Stainless Steel Coil** is readily welded by arc welding processes. When gauge thickness and weld joint geometry allow the use of gas-shielded metal-arc welding, joints having good properties are easily obtained. **409 Stainless Steel Strip** offers scaling resistance at temperatures up to 675°C during continuous operation, and up to 815°C under intermittent conditions. These temperatures obtain from specific service environments. It must be preheated to a temperature of 150 to 260°C before welding.

409 Stainless Steel Plate uses include agricultural spreaders, fuel filters, tubular manifolds, automotive and truck exhaust systems, gas turbine exhaust silencers, and heat exchangers. A240 409 provides good corrosion and oxidation resistance for automotive and non-automotive exhaust applications. A240 Type 409 is particularly suitable for parts that need more improved weldability and complex shapes. The corrosion resistance of A240 Type 409 is similar to A240 Type 410 which helps it to perform far superior to carbon steel products in most applications.
