

Alloy Steel Grade P9 Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. The **SA 335 gr P9 alloy steel pipe** schedules range from 20 to XXH and more. Depending on the application requirement for pressure containment, the pressure classes differ as well. Also the P9 metal pipe material could be formed under fully annealed or normalized and tempered conditions. These pipes are therefore highly resistant in high temperature and corrosive environments. The ASTM A335 gr P9 seamless pipe has less absolute roughness and is therefore very accurate in dimensions. The sizes of the **A335 gr P9 alloy pipe** range from ½ inches and up under average requirements. The thermal expansion rate of this material is considerably less so that it does not lose its form or shape under high temperatures.

ASME SA 335 Grade P9 Alloy Steel Pipes are mostly used in the power generation industries and in petrochemical industries. The ASTM A335 P9 Pipe standards and schedules differ according to the need of the application. These pipes are therefore highly resistant in high temperature and corrosive environments. ASTM A335 P9 Seamless Pipe is one of the chromium molybdenum alloy pipes. This kind of material is used for high temperature and pressure applications. There is a 9% chromium and 1% molybdenum in the A335 P9 Chrome Pipe composition.

Alloy Steel P9 Pipes, Alloy Steel P9 Welded Rectangular Pipes Manufacturers, Alloy Steel P9 Seamless Pipe Suppliers, Alloy Steel P9 Marine Exhaust Pipe Exporters Alloy Steel P9 Polished Decorative Pipe Stockists.

Alloy Steel P9 Square Pipe in India, Alloy Steel P9 Pipes Manufacturers in India, Alloy Steel P9 Rectangular Pipe Suppliers in India, Alloy Steel P9 Hydraulic Pipe Exporters in India, Alloy Steel P9 ERW Pipes Stockists in India.

Chhaged Steel & Alloy Pvt Ltd.

Office No 7, 42/46, Mughbat Lane, Shantaram Chawl, Girgaum, Mumbai - 400 004.
