

## Alloy Steel Pipes

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Ferritic Alloy Steel Pipe** are known to have higher contents of chromium along with a low carbon content. These magnetic Alloy Steel Pipe demonstrate important properties such as their good ductility, good resistance to corrosion as well as good resistance to stress related corrosion cracking. **High Temperature Alloy Steel Boiler Pipe** is used in those applications where the temperature of the environment exceeds 500 °C. For instance, the hollow and thin walled, Alloy Steel Drill Pipe must be able to resist pressure differentials, which is noticed between both inside and outside these Alloy Steel Seamless Pipe, when used on drilling rigs. IBR approved Alloy Steel Pipe is commonly seen in applications involving the automotive, kitchen-ware, and industrial equipment.

**ERW Low Alloy Steel Pipe** are available in various wall thicknesses, qualities, diameters and different finishes, as required by our clients. The Alloy Steel ERW Pipe, we produced are used in various engineering purposes, scaffolding, fencing as well as in line pipes etc. An advantage of using the alloy steel pipe is that these material possess a clean and accurate surface, since only the edges of these pipes are heated. A lower content of carbon in the Seamless Alloy Steel Pipe is what gives the alloy resistance from being susceptible to graphitization and intergranular corrosion.

**Alloy Steel Pipes, Alloy Steel Welded Rectangular Pipes Manufacturers, Alloy Steel Seamless Pipe Suppliers, Alloy Steel Marine Exhaust Pipe Exporters Alloy Steel Polished Decorative Pipe Stockists.**

**Alloy Steel Square Pipe in India, Alloy Steel Pipes Manufacturers in India, Alloy Steel Rectangular Pipe Suppliers in India, Alloy Steel Hydraulic Pipe Exporters in India, Alloy Steel ERW Pipes Stockists in India.**

**Chhajed Steel & Alloy Pvt Ltd.**

Office No 7, 42/46, Mughbat Lane, Shantaram Chawl, Girgaum, Mumbai - 400 004.
