

Aluminium Alloy Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Aluminum Pipe** uses of these pipes are seen in different industries. It is a type of metal pipes made up of aluminum. Although it is cheaper than copper, it is not used in plumbing for water lines because the pipes could corrode easily in water. **Aluminum Pipe** can react with water and produce oxides and deposit them into water as well. The Seamless Aluminum Pipes are made in different shapes and sizes. They are drawn directly from solid aluminum sources and therefore there is no a welded track or mark on it. Since aluminum is not as strong as some other metal alloy materials, it has to be optimized for strength. The **Aluminum Square Pipes** can be used with somewhat stronger applications without collapsing the shape. Instead of the round pipes which are weaker at bends, the square pipes are stronger at corners because of the geometry.

The **Aluminum Section Pipes** are light weight, they are used in system which mandate lightweight. They can be used in larger applications like the fuselages of planes and in fuel pipe lines. The Threaded Aluminum Pipes could be joint without the need of welding. So the Aluminum Seamless Pipes could be used in applications that are lightweight and require high precision. There is Large Diameter Aluminum Pipes as well as small diameter aluminum pipes.

Aluminium Alloy Pipes, Aluminium Alloy Welded Rectangular Pipes Manufacturers, Aluminium Alloy Seamless Pipe Suppliers, Aluminium Alloy Marine Exhaust Pipe Exporters Aluminium Alloy Polished Decorative Pipe Stockist.

Aluminium Alloy Square Pipe in India, Aluminium Alloy Pipes Manufacturers in India, Aluminium Alloy Rectangular Pipe Suppliers in India, Aluminium Alloy Hydraulic Pipe Exporters in India, Aluminium Alloy ERW Pipes Stockist in India.

Chhaged Steel & Alloy Pvt Ltd.

Office No 7, 42/46, Mughbat Lane, Shantaram Chawl, Girgaum, Mumbai - 400 004.
