

15Mo3 Alloy Steel Sheets & Plates

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **ASTM A204 15MO3 Plates** known as ASTM A204 15MO3 alloy steel chequer plates are metal plates with regular and even patterns of projection on either side showing different types of shapes while the reverse side remains smooth. They are used in the production of pressure vessels, furnaces, parts of steam boilers, flanges, nuts, coils, collectors, and other energy equipment. It comes in various shapes such as teardrop, diamond, or embossed, the amounts of alloying elements may vary between 1 and 50%. It is a type of steel alloyed with several elements such as chromium, molybdenum, vanadium, boron, silicon, manganese, and nickel.

Alloy Steel Hot Rolled Plates used in the manufacturing of heating elements in appliances like corrosion-resistant containers, silverware, pots pans, and toasters. They are most commonly used to manufacture pipes, especially pipes for energy-related applications. Alloy Steel 15mo3 Plate due to the materials chrome and molybdenum content, **A204 Alloy Steel 15mo3 Plates** has excellent heat resistance and corrosion-resistant characteristics. They are used as weldable steel in the fabrication of industrial boilers and steel pressurized vessels found in the oil, gas, and chemical industry.
