

Corten Steel Sheets & Plates

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Corten Steel Plates** is been fabricated by using high quality material and we constantly work to improve the fabrication process in order to furnish a high class product. When **Corten Steel Sheet** is exposed to the elements it's chemical composition promotes the early formation of an adhering protective layer of rust. It is copper chromium alloy steel. They displays a greater level of resistance to atmospheric weathering as compared to other unalloyed steels. Astm a588 weathering steel sheet is use in welded bridges and other structures where savings in weight or added durability is important along with the longer life cycle due to its corrosion resistant properties.

ASTM A242 Corten Plate, when properly exposed to the atmosphere, A242 is suitable for many applications in the unpainted condition. They are atmospheric corrosion resistance is substantially better than that of carbon steels such as A36 and A572-50 with or without copper addition. Astm a588 Steel has has minimum yield strength of 50ksi and a minimum. They have high strength low-alloy structural steel with improved atmospheric corrosion resistance for structural steel shapes such as angles, channel and beams, as well as steel plate and bars.

A588 grade a can be delivered in a condition such as hot rolled, cold rolled, normalized, quenched, tempering, thermal mechanical control process (TMCP), HIC test. Density of **3mm Corten Steel Sheet** is 7.85 g/cm³, or 23.55 kg per square meter of material. Astm a588 grade a weathering steel plate has been designed to provide a high resistance to atmospheric corrosion, especially in urban environment. It has 345Mpa minimum yield point to 100mm thickness. It is suitable for many applications in the bare condition when it is properly exposed to the atmosphere. Corten b steel has been designed to provide a high resistance to atmospheric corrosion, especial in urban environment. It is a weather resistant steel is better suitable for load bearing and heavy structures.

Corten Steel Sheets & Plates, Corten Steel No.4 Hairline Inox Sheets Manufacturers, Corten Steel Hot Rolled Plates Suppliers, Corten Steel Cold Rolled Plates Exporters Corten Steel No 4 Satin Finish Sheets Stockist.

Corten Steel Shim Sheets in India, Corten Steel Sheets & Plates Manufacturers in India, Corten Steel Hot Rolled 2B finish 6mm Sheets Suppliers in India, Corten Steel 4mm Cold Rolled Sheets & Plates Exporters in India, Corten Steel Perforated Sheet Stockist in India
