

Pump Shaft Quality SS Round Bars

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Pump Shaft Quality Stainless Steel Bar** enhances the performance which further ensures minimum vibration through the complete shaft length which results in a more effective, high-performing pumping system, efficient, stable and reliable. They can vary in different shape depending on the pump application, it has been manufactured to a higher standard than common steel bars.

Pump Shaft Quality Stainless Steel Bar was earlier used for precision shafting in pumps but now because of its tighter diameter tolerances, it is being manufactured to a higher standard than common steel bars. **PSQ Round Bar** is a straight bar that transmits motion and torque which is supported by bearings and carries gears/ wheels.
