

Titanium Alloy Grade 2 Round Bars

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Titanium Grade 2 Round Bar** is been recognized across the world due to its high material strength and low weight with moderate strength and excellent corrosion resistance and formability, represents the most widely used form of titanium. They are pure alpha titanium round bar. In **Grade 2 Titanium Hex Bar** most applications it is typically alloyed with 6% of aluminum and 4% of vanadium. They are typically available in the annealed condition and is readily heat treatable to increase strength, for a wide range of applications.

Grade 2 Titanium Rod properties are versatile in regard to its applications. They are slightly weaker than grade 3 and stronger than grade 2. Titanium Grade 2 B348 Bar is fully resistant to corrosion at temperatures up to 300°C in seawater, also used to manufacture heat exchangers and cryogenic vessels. They are highly resistant to chemical environments including oxidizing media, alkaline media, aqueous salt solutions organic acids, and compounds, and hot gases.

Titanium Alloy Grade 2 Round Bars, Titanium Alloy Grade 2 Round Bars Manufacturers, Titanium Alloy Grade 2 Round Bars Suppliers, Titanium Alloy Grade 2 Round Bars Exporters Titanium Stockist.

Titanium Alloy Grade 2 Round Bars in India, Titanium Alloy Grade 2 Round Bars Manufacturers in India, Titanium Alloy Grade 2 Round Bars Suppliers in India, Titanium Alloy Grade 2 Round Bars Exporters in India, Titanium Stockist in India.
